

# FAUBOURG COLLECTION

Ref. G2T métal - G2K porcelaine blanche - G2L porcelaine noire (cross handles)  
Ref. G2U métal - G2J porcelaine blanche - G2M porcelaine noire (levers)

## A FRESH AND TIMELESS COLLECTION

This series, conceived by designer Pierre-Yves Rochon, is the perfect illustration of classicism, with a twist of the paradoxical in its at once sharp and slender metal lines.

Synonymous both with "French chic" and purity, Faubourg gives a discreet but effective touch to every bathroom decor.

Faubourg uses several materials: metal (G2T and G2U), white porcelain (G2K and G2J) and black porcelain (G2L and G2M).

### TRANSITIONAL COLLECTIONS

THG Paris transitional collections combine the comfort and warmth of the traditional style with the pure lines and understated shapes of the contemporary style.

The corresponding brass, old silver and nickel finishes are often associated with this style.

## PIERRE-YVES ROCHON

Before opening his proper office at 30 year old, Pierre-Yves Rochon worked for well-known brand-names for contemporary decorators where he could test all the trends and styles.

His first creations - often under competition - were shared between offices, flats, houses and especially the famous "Crayères" hotel in Reims which would be the beginning of a real conquest of the prestigious international hotels trade.
