

# ICON-X COLLECTION

Design by Studio F. A. Porsche

THG<sup>®</sup>  
PARIS

Prof. Ferdinand Alexander's philosophy, illustrating the symbiosis between functionality and design, has never resonated as much as with this new collection of fittings, an engineering in essence. Thus, ICON-X alone embodies the shared values of the two Houses, and offers a functional and sensitive experience, a claimed Art de Vivre.

## STUDIO F. A. PORSCHE

Design must be honest - these four words spoken by the founder, Ferdinand Alexander Porsche, get to the heart of our thinking. They mean that design is not simply decoration or superficial beautification, but rather the perfect symbiosis of form and function.
