

## MATT GOLD

Matt gold is a little more pure and modern than polished gold, warming and brightening tap fittings without compromising or oppressing their appearance. The patina effect on matt gold plating is obtained using traditional techniques passed down by THG Paris's master craftsmen.

Reference: F07

## CHARACTERISTICS

The matt finish is the result of a deposit of 24 carat gold 3N, over a matt nickel underlay, with thickness up to 2µm depending on purpose. The almost 100% purity of the deposited gold assures excellent resistance to corrosion and durability. With suitable care, the coating will maintain its sparkle.

## ADVICE

Ease of cleaning: Delicate  
Corrosion resistance: Good  
Scratch resistance: Delicate  
Resistance to cleaning products: Good

## INSPIRATIONS

All the THG Paris coatings are created in our workshops.  
Our complete mastery of products and finishes gives you complete security and the best guarantee
