

## MATT BLUSH PVD

Meet Matt Blush PVD, a harmonious fusion of rose gold and traditional copper. More refined and sophisticated than Bright Gold, Blush PVD brings a much-welcome soft feminine touch to any interior. This finish is especially suited and recommended for brassware and accessories used in the project sector.

Reference: H60

### CHARACTERISTICS

The Blush PVD finish is applied with the Physical Vapor Deposit surface treatment process, or PVD. This breakthrough technology, borrowed from the watch making industry, triggers the vaporisation of a metal alloy, in a plasma environment, which is then deposited, with precision, on the surface of THG Paris brassware and accessories.

This treatment offers the possibility to create a much larger array of colours and shades, when compared to traditional surface finishing treatments, by leveraging the composition of the metal alloy and the plasma. THG Paris uses exclusively a Titanium/Zirconium alloy, renowned for its hardness; this is the main component which contributes to the finish exceptional mechanical resistance. THG Paris PVD finishes are applied over a layer of nickel and chrome, thus guaranteeing an excellent resistance to corrosion.

The brushed aspect is applied by hand before the PVD stage.

### ADVICE

Ease of cleaning: Very easy  
Corrosion resistance: Excellent  
Scratch resistance: Excellent  
Resistance to cleaning products: Excellent
