

## MATT BRONZE BROWN COLOR PVD

This Bronze Brown Matt PVD finish sits perfectly with the trend towards the raw, industrial and the vintage. This matt finish, a little less finished and elegant than the polished version, suits vintage, industrial and contemporary tap fittings and makes unlimited creativity possible when it comes to decorative touches.

Reference: F34

### CHARACTERISTICS

Matt bronze brown PVD is produced using PVD (Physical Vapor Deposit) technology, which consists of spraying an alloy of metals and gases onto faucets and accessories. The color of the PVD varies according to the composition of the gases and metals that make up this alloy. We use Titanium and Zirconium, known for their great hardness; they are the ones who improve the mechanical strength of the product. Our PVD are made on a sub-layer of nickel and chromium, the assembly ensuring excellent resistance to corrosion. The brushed appearance is performed manually on each of the parts before PVD deposit.

### ADVICE

Ease of cleaning: Very easy  
Corrosion resistance: Excellent  
Scratch resistance: Excellent  
Resistance to cleaning products: Excellent

### INSPIRATIONS

All the THG Paris coatings are created in our workshops.
