

## NATURAL RED COPPER , UNCOATED

This finish is only available on GB2 metal washbasins.

Référence : O04

## NATURAL BRASS, UNCOATED

This finish is only available on GB2 metal washbasins.

Référence : O05

### CHARACTERISTICS

Copper and brass have been used for thousands of years and are the metals historically used in the manufacture of metal basins. The warmth of these materials will give your bathroom an authentic look.

You will love the evolutionary character of the colour; copper and brass getting a patina like the domestic objects of yesteryear.

Others prefer to preserve the original beauty of the metal by maintaining it regularly.

### ADVICE

Ease of cleaning: Good

Corrosion resistance: Good

Scratch resistance: Medium

Resistance to cleaning products: Good

For the maintenance of these finishes, we recommend the use of our ref.G00.SN3 Cleaning set for polishing
