# Installation

## Réglage de la température

Votre mitigeur est muni d'une cartouche à butée de température. En cas de température trop élevée du réseau eau chaude et pour éviter les brûlures; enlever la bague grise et la tourner de quelques crans pour réduire la température maximum.

*Your mixer is fitted out with a temperature adjustment cartridge. In case the temperature of hot water is too high and to avoid burns, remove the red ring and turn it around by a few marks to reduce the maximum temperature stop*

## PURGER LES CANALISATIONS – CLEAN THE PIPES

1. Démontez la cartouche et mettez le joint blanc  
*Dismount the cartridge and put the white rubber*

3. Visser le cache de serrage + le bouchon de purge sur le corps afin de purger les canalisations.

*Screw the mask of tightening + the purge plug on the body in order to purge the pipes.*

2. Installer le bouchon de purge dans le cache de serrage

*Install the purge plug into the mask of tightening*

5. Pour le remontage de la cartouche, serrer le cache à la main jusqu'à contact, puis effectuer un serrage angulaire de 30° à l'aide d'une clé.

*For the reassembly of the cartridge, tighten the hiding place with the hand until contact, then carry out an angular tightening of 30°*
